Re: Water Quality Certification Letter of Verification (LOV) –
Bank Stabilization -Nationwide Permit (NWP) #

Dear

The Department of Ecology (Ecology) has received the U.S. Army Corps of Engineers' Nationwide Permit authorizing your proposal to remove approximately 108 feet of deteriorating bulkhead and stabilize the eroding bank with a combination of rock, reinforced soil lifts and native vegetation along the shoreline of Moses Lake, at
, in Grant County, Washington.

Upon review, Ecology has determined that this project meets the requirements for Washington State 401 Water Quality Certification under NWP 13. Therefore, an Individual 401 permit from Ecology will not be required for this project and you may proceed as directed by the Corps.

Please note this Letter of Verification is provisional upon compliance with other statutes and codes administered by federal, state and local agencies.

If you have any questions, please contact me at (509) :

Sincerely,

Ecology Regional Federal Permit Coordinator
